Dear

Re: Elizabeth House Medical Practice, Warlingham, Surrey

We are seeking clinical partners to offer community based health care to our community of Warlingham, Woldingham, Chelsham, Farleigh, Sanderstead and Tatsfield.

Elizabeth House Medical Practice is a long established, successful and popular general medical practice in Warlingham lead by Dr Derrick Hinkes and Dr Howard Cohen. We provide NHS care to a practice population of 5000 people.

Over the last eighteen months we have doubled the capacity of our premises on the Limpsfield Road, creating an up to date and attractive medical centre which is fully compliant with disability access and patient safety requirements.

We are actively seeking clinical partners to join us in creating a multidisciplinary service for our patients and the wider community. We already have established osteopathic and podiatry clinics, along with an innovative legal mediation service. We have considerable clinical space available which can readily be commissioned for an optometry practice.

We would like the opportunity to meet with you so that you may look at the space we have available and explore how we might work together to meet the needs of your

practice and our community.

Please contact either Mrs Kim Pateman (our Practice Manager) or Dr Howard Cohen on 01883 625262 to arrange an informal visit.

Yours sincerely,

Dr Howard Cohen
